CHANGHUA CHRISTIAN HOSPITAL

July 12, 2011

The slide features a light green background. At the top left, there is a photograph of a modern hospital building and two people standing on a grassy hill. The title is centered in a white box. The hospital's name is written vertically on the right and horizontally at the bottom left. The date is centered below the title. A circular logo with a red flame and a green base is in the bottom right corner.

 - Diet education
 - Diabetes care education

Initial Stage Care Education

Initial visit

Follow-up visit

Yearly evaluation

Diabetes care provision program: Initial visit education topics

1. Diabetes disease mechanism
2. Glycemic goals (fasting and postprandial blood glucose, A1C)
3. Medication use instruction
4. Exercise rules
5. Hypoglycemia
6. Chronic complications
7. Foot exam

CHANGHUA CHRISTIAN HOSPITAL

彰化基督教醫院
CHANGHUA CHRISTIAN HOSPITAL

Diabetes care provision program: Follow-up visit

- Medication adherence
- Explanation of test results (lab data, retinal photography)
- *Daily precautions for patients with retinopathy
- Assess effectiveness of exercise (type, frequency, duration)
- **Importance and significance of self-monitoring of blood glucose**
- Assess occurrence of hypoglycemia
- *Assess insulin injection (site of injection, dosage, adherence)

*Only for applicable patients

CHANGHUA CHRISTIAN HOSPITAL

彰化基督教醫院
CHANGHUA CHRISTIAN HOSPITAL

Diabetes care provision program: Follow-up visit 2

- Medication adherence
- Explanation of test results
- Assess effectiveness of exercise (type, frequency, duration)
- Assess occurrence of hypoglycemia
- *Assess insulin injection (site of injection, dosage, adherence)
- **Physiologic changes of the pancreas**

*Only for applicable patients

 CHANGHUA CHRISTIAN HOSPITAL

Diabetes care provision program: Follow-up visit 3

- Medication adherence
- Explanation of test results
- Assess effectiveness of exercise (type, frequency, duration)
- Assess occurrence of hypoglycemia
- *Assess insulin injection (site of injection, dosage, adherence)
- **Overview of insulin, inquire patient's opinion concerning insulin**

*Only for applicable patients

 CHANGHUA CHRISTIAN HOSPITAL

Diabetes care provision program: Yearly evaluation

- Medication adherence
- Explanation of test results
- Assess effectiveness of exercise (type, frequency, duration)
- Assess occurrence of hypoglycemia

Peripheral artery disease screening (outpatient and inpatient)

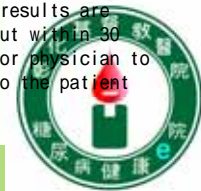

PAD screening device

Determine arterial blockage or sclerosis by non-invasive measurement of blood pressure in all limbs

All test results are printed out within 30 seconds for physician to explain to the patient

Continuous subcutaneous insulin infusion (self-paid item)

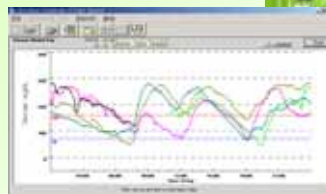

**CSII
certification**

Continuous glucose monitoring system (self-paid item)

Subcutaneous placement of sensor

72-hour blood glucose tracing

**CGMS
certification**

CHANGHUA CHRISTIAN HOSPITAL

Diabetes e Institute Diabetic Patient Group Organization

CHANGHUA CHRISTIAN HOSPITAL

- Diabetic patient group: established on Dec. 27, 1997

Aims

- Encourage sharing of experiences and increase patient's self-adjust and self-care ability
- Establish companionship and rapport among patients
- Increase the patient, their families, and the public's knowledge concerning diabetes and its prevention
- Improve the health and life quality of the patients
- Utilize available resources to improve care outcome and reduce occurrence of disease complications
- Increase interaction and improve relationship between educators and patients
- Understand each patient's characteristics, habits, and relationship with the family

Purpose of the diabetic patient group

- Provide diabetes health education and related information
- Provide a comfortable environment to encourage expression of feelings and elicit questions from patients
- Assist patients to build a support network

Appointing the leader of the group

Elected by members of the group

Missions of the group leader

- Establish a service team and enforce related operations, such as patient support, literature distribution, accounting, administration, and activities
- Recruit participants and supporters by making the group known to others
- Assist in the organizing of various group activities
- Assist maladaptive patients through various group activities, help them find appropriate referrals and encourage them to share in small groups and gain support.
- Participate in related social activities on behalf of the group

- Keep abreast with the latest healthcare information related to diabetes
- Establish good interpersonal relationship with related healthcare teams

Activities

- **Type 2 Diabetes Patient Group Gathering**
- Frequency:
- Indoor seminar: once every quarter, Saturday 8:30-11:00
- Field trip: Once a year in autumn (September-November), accompanied by physicians, nurse educators, and dietitians

 CHANGHUA CHRISTIAN HOSPITAL

彰化基督教醫院
CHANGHUA CHRISTIAN HOSPITAL

- Check blood pressure and blood sugar free of charge, complete diabetes passport, specialist seminar (physician, nurse educator, dietitian, etc.), sharing among patients and families, physical exercise, quiz game, lottery, healthy food preparation (such as making healthy rice dumpling)

 CHANGHUA CHRISTIAN HOSPITAL

彰化基督教醫院
CHANGHUA CHRISTIAN HOSPITAL

Type 1 Diabetes Patient Group Gathering

- Frequency: Once every summer and winter
- Winter: One day field trip (4th Saturday in January or February, 7:30-18:00)
- Must be accompanied by physician, nurse educator, and dietician during the field trip
- Summer: Indoor seminar (4th Saturday in August, 13:00-17:30)

CHANGHUA CHRISTIAN HOSPITAL

彰化基督教醫院
CHANGHUA CHRISTIAN HOSPITAL

- Check blood sugar, maintenance and calibration of glucometer, free of charge
